Career Objective

B.E. Computer Science graduate with a strong foundation in Java and web development (HTML, CSS, JavaScript, React), along with hands-on experience in Power BI, DAX, and data modeling. Skilled in building interactive dashboards and analyzing business data to generate actionable insights. Seeking an entry-level Data Analyst opportunity to leverage analytical and technical skills to support data-driven decision-making and organizational growth.

EDUCATION

Dhanalakshmi College Of Engineering 2021 - 2025
Bachelor of Engineering – Computer Science and Engineering; CGPA: 7.56

Velammal Vidhyashram (CBSE) Sr. Sec. School , HSC 2020 - 2021
Percentage:77%

Kendriya Vidyalaya CRPF (CBSE) Hr. Sec. School, SSLC 2018 - 2019
Percentage:70%

SKILLS

- **Programming & Data**: Python (Pandas, NumPy, Matplotlib)
- **Analytical & BI:** Data Cleaning, KPI Dashboards, Statistical Modelling
- **Front-End**: HTML5, CSS3, JavaScript, React.js
- **Visualization**: Excel, MySQL, Power BI (DAX, Data Modeling, Tooltips)

PROJECTS

Vendor Performance Analysis Dashboard Jan 2026 - Feb 2026
Designed a Power BI dashboard to analyze vendor and sales performance using transactional data. Performed data cleaning with Power Query, built a data model, and created DAX measures to calculate KPIs such as Total Sales, Gross Profit, and Profit Margin with interactive visualizations.
| **Technologies:** Power BI, DAX, Power Query, Data Modelling |

Blinkit Sales Performance Analysis Dashboard Dec 2025 – Jan 2026
Developed an interactive Power BI dashboard to analyze Blinkit's sales and outlet performance using retail data. Cleaned and transformed data with Power Query, built a relational data model, and created DAX measures to calculate key KPIs and generate actionable business insights.
| **Technologies:** Power BI, DAX, Power Query, Data Modelling |

Car Sales Performance Analysis Dashboard | Feb 2026 – Mar 2026
Developed an interactive Power BI dashboard to analyze car sales performance, including YTD trends, pricing insights, and regional distribution. Performed data cleaning using Power Query, built a data model, and created DAX measures to track KPIs and support data-driven decision-making.
| Technologies: Power BI, DAX, Power Query, Data Modelling **|**

Pizza Sales Analysis Mar 2026 – Apr 2026
Performed exploratory data analysis on pizza sales data using Python to uncover key business insights, including revenue trends, customer ordering patterns, and product performance. Analyzed KPIs such as total revenue ($817K+), total orders (21K+), and average order value, along with category-wise and time-based trends to support data-driven decisions
| Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn **|**

Ticket Booking Management System Jun 2025 - Jul 2025

Designed and Enhanced a web-based application for booking and managing tickets, featuring a user-friendly form-based interface to capture passenger details such as name, seat number, travel date, source, and destination. Implemented an auto-generated ticket ID system to uniquely identify each booking and developed a booking history module that allows users to view and delete previously booked tickets efficiently.

| **Technologies:** HTML5, CSS3, JavaScript |

You Tube Thumbnail Downloader Jul 2025 - Aug 2025

Built a web application to fetch and download YouTube video thumbnails in multiple qualities, including Default, HD, and Max HD. Implemented a one-click thumbnail download feature using JavaScript and added an interactive preview option with zoom-in and zoom-out functionality for improved usability. Additionally, applied under-sampling and Ensemble techniques to address class imbalance, resulting in a 15% improvement in overall model performance.

| **Technologies:** HTML5, CSS3, JavaScript |
